CONTROL THE WEATHER...

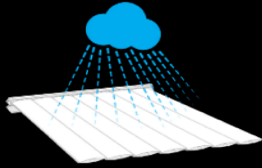

SUN

Angle the louvers to allow as little or as much sunlight through as you choose.

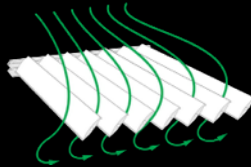

RAIN

Close the louvers for a 100% watertight seal. Rain landing on top is directed to internal gutters.

WIND

Opening the louvers allows hot air to escape and cool breezes to be captured and circulated below.

ENJOY THE EASE...

SOLAR POWERED

The system is powered by a small 5W solar panel that recharges a 12V Lithium Ion battery. No hardwiring needed.

REMOTE CONTROLLED

Opening and closing the louvers is as easy as using the remote control or switch.

GUARANTEED

Enjoy piece of mind with our industry-leading 30-Yr Limited Structural Warranty and 10-Yr Installation Warranty.

BEAT THE ELEMENTS...

RUST-FREE

All materials are marine-grade aluminum that cannot rust and are immune to deterioration. Fasteners are stainless steel.

POWDER COATED

Materials are protected by a UV-resistant, 80 Micron powder coat. The baked-on talc acrylic won't crack, peel or bubble and never needs repainting.

HURRICANE RATED

All structures are rated to withstand 120+ mph winds. Louvers are rated to 105 mph in a closed position, but opening them relieves almost all uplift.

COMMERCIAL PORTFOLIO

RESORTS & HOTELS

Trump International Hotel, Waikiki, Oahu
 Sheraton Waikiki Hotel & Resort, Waikiki, Oahu
